Agile Team Charter

1. Team Purpose & Vision

Why do we exist as a team?

- **Team mission:**
  We build a secure, easy-to-use app that shortens waiting at community clinics, makes booking clear, and gets help to people in an emergency faster.
- **Success definition:**
  A working deployed and installable app with booking, a queue, a one-tap SOS, role-based access and protected patient data, built and presented at the end of the sprint.
- **Product / Service:**
  CareConnect, a mobile-first web app for a Cape Town community clinic. Live app:
  https://care-connect-delta-puce.vercel.app
  https://github.com/PamMasina/CareConnect

The problems we set out to solve:

1. Fragmented booking: patients wait with no view of the queue and call or visit several clinics to check availability.

2. No guidance: patients cannot tell which specialist they need, so bookings go astray.

3. No emergency channel: there is no instant digital way to alert first responders.

2. Team Members & Roles

Who is on the team and how do we contribute?

Andile Pamela Masina: Frontend Developer
Nuyra Swanson: Researcher
Olwethu Tshing: Backend Developer
Siphelele Zono: Project Manager
Sinalo Kebetwana: Database Developer

3. Ways of Working

How we work together day to day

3.1 Agile Framework

Kanban Trello tool. One sprint (Sprint 1) from 12 to 16 October 2026, tracked on a Trello board with the lists Product Backlog, Progress, Completed and Sprint 1. The final presentation was on Monday 19 October 2026.

3.2 Ceremonies

Planning: group sessions to choose the problem, agree the scope and divide the work (12 and 14 October).
Check-ins: face-to-face group discussions during the sprint.
Review: the final presentation and live demo of CareConnect.
Retrospective: a reflection on what went well, what was hard and what we would change.

4. Working Agreements

Rules we agree to follow as a team

- We show up prepared and on time
- We respect timeboxes
- We give constructive feedback
- We raise blockers early
- We commit to continuous improvement
- We share our work through GitHub and Microsoft Teams

5. Communication

How and when we communicate

- **Primary channels:**
  Face-to-face group discussions, Microsoft Teams for sharing documents and slides, and GitHub for code.
- **Response-time expectations:**
  We reply within the working day, and urgent messages as soon as possible.
- **Remote / hybrid norms:**
  Mostly in person, with Microsoft Teams for sharing files.

6. Decision-Making

How decisions are made

- ☑ Consensus
- ☐ Product Owner final decision
- ☐ Team vote
- ☐ Agile Lead decides after input

Escalation path if we're stuck:
We discuss it as a team first, then ask our facilitator.

Definition of Done (DoD)
When is work really "done"?

Our standard:

- Features are working correctly
- Committed to GitHub
- Works on the deployed Vercel version
- Documentation shared with the team
- Ready for demonstration

7. Core Values & Behaviours

How we treat each other

- Respect
- Transparency
- Accountability
- Trust
- Learning mindset

8. Risks & Constraints

What could impact our success?

- Known risks: securing patient data with role-based access; keeping the queue and SOS up to date for every user; very little time.
- Dependencies: Supabase (login, database, security), Vercel hosting, Microsoft Teams, and location access on the phone for the SOS.

- Constraints (time, budget, tools, skills): one short sprint with a fixed presentation date; demo and seed data only, with no real patient records; most of the app built by one team member; an app-only service leaves out people without data or a device.

9. Review & Improvement

Keeping the charter alive

- Charter reviewed every:
  ☐ Quarter ☐ Release ☑ Retrospective
- Last updated: October 2026

10. Team Commitment

Our agreement to this charter

By working on this team, we commit to the principles and agreements outlined above.

Name	**Signature/Agreement**
Andile Pamela Masina	AP Masina
Nuyra Swanson	N Swanson
Olwethu Tshingo	O Tshingo
Siphelele Zono	S Zono
Sinalo Kebetwana	S Kebetwana
